

VANGUARD LIFEBOAT MOVES TRAINING COURSE TO CHINA FOR BETTER TRAINING EXPERIENCE AND SKILL ENHANCEMENT

As the world's leading life-saving equipment manufacturer for the marine and oil and gas industry, Vanguard Lifeboat has been providing training programs for service engineers and seafarers for over 20 years. In 2017, Vanguard Lifeboat shifted its training program from _____ to the manufacturing plant located in Nantong, China for better training experience and skill enhancement in an actual operating environment.

At Vanguard Lifeboat, we hold an intrinsic belief that the safety of equipment is only as good as the service it has. We make sure all Vanguard's in-house and authorized service agents are at the forefront of the industry with the understanding of all latest news and regulations as well as a comprehensive service/ repair skill to the products.

Starting this year, all Vanguard Lifeboat's service engineer training program will be conducted at Vanguard (Nantong) F.R.P. Co., Ltd (a subsidiary of Vanguard Lifeboat) in Nantong, China. The 20,000sqm manufacturing plant is equipped with a slipway, testing area, fabrication, mechanical and electrical workshops, laminating chamber and painting area.

Vanguard Lifeboat offers a one-week training program every quarter of the year. In order to make sure all Vanguard's service engineers have a thorough understanding of the product, we train our engineers to work in an actual job environment and get involved in the lifeboat building process. The program will be carried out in the workshop which includes hand-on courses on all products, latest regulations familiarization, workplace emergency handling and hook retrofit program. Through this training program, we provide a framework for their jobs—the service engineers know

why they do what they do. Our engineers will not only learn on how to improve their skills, but also expand their skills in problem solving and how to handle workplace situations.

The up-coming "Service Engineer Training Program" will be held on 17th April – 21st April 2017. All service agents will receive a certificate and ID card upon the end of the training program. This all-in-one training program includes the technical knowledge and skills on the followings:

TRAINING PROGRAM:

- IMO Regulation Familiarization
- Annual Inspection and Servicing Training for lifeboat and rescue boat
- 5 Yearly Maintenance and Overhaul Training for lifeboat and rescue boat
- Commissioning Training
- Davit and Winch Maintenance and Servicing Training
- Fibreglass Repair
- CSafe Hook Retrofit Program

For registration and more info about the training program, please visit www.vanguardlifeboat.com or email to marketing@vanguardlifeboat.com

ABOUT VANGUARD LIFEBOAT

Based in Singapore, **VANGUARD LIFEBOAT** is a wholly owned subsidiary of Malaysian based integrated engineering solutions provider **DESTINI BERHAD**.

VANGUARD LIFEBOAT has made a name for itself as a trusted and reliable global lifeboat brand. The Company manufactures conventional and hyperbaric lifeboats, fast rescue boats, davit systems and a host of other safety equipment for the marine and oil and gas industries.

VANGUARD LIFEBOAT's strength lies within its quality, delivery and worldwide service care network. Coupled with our in house engineering and technical teams we ensure we remain at the forefront of lifesaving developments and technology. **VANGUARD LIFEBOAT** is ISO 9001 certified under Bureau Veritas.
